

2011 NEW INTRODUCTIONS

UP

At long last, eager Russell has earned the final badge (“Assisting the Elderly”) he needs to graduate to Senior Wilderness Explorer. Honored to celebrate this important achievement with Russell is his unlikely explorer companion Carl Fredricksen, who salutes the boy’s heroics with his own heartfelt award. “This Ellie Badge reaches way back to the very first things we saw in the film. It’s like Ellie brought Carl in and befriended him, and now he’s doing the same thing with Russell,” stated Up co-writer Bob Peterson. Carl wears pewter eyeglass frames with acrylic lenses and Russell has a pewter clasp on his neckerchief. Just as Carl bestows upon Russell the greatest honor of all — the Ellie badge — a special “Ellie” Grape Soda pin is included, making this a moment of true merit.

PETER PAN

When Peter Pan declares he's taking Wendy Darling to Never Land, the entranced young girl is so overjoyed that she decides she will give Peter a kiss — and tiny but temperamental Tinker Bell is having none of it. As for Peter, he doesn't know what a kiss is but he's thrown off balance at the prospect of receiving one...a rare occurrence for the bold boy from the realm of enchantment. Plussed with a pewter feather in Peter's hat, pewter legs for Wendy, and a bronze Tinker Bell, this dynamic sculpture — bringing together the three most treasured figures from the spellbinding tale of Never Land — reflects Walt Disney's words: "All the characters in Peter Pan are in some way touched with magic," even, as Walt described her, "beloved Wendy."

FANTASIA

As Walt Disney and his artists created Fantasia's ethereal Fairies, director Sam Armstrong suggested that "The Fairies can dart around like a hummingbird, then stay poised, still in the air with their wings humming; then dart again." Even when still, as in this sculpted portrayal of the Lily of the Valley Fairy, the dainty sprite conveys a spirit of motion. The fantastical Fairy motif is one of the most fanciful of the many entrancing elements that make up "The Nutcracker Suite" for, while many of the characters are nature's own flora and fauna, the gossamer fairies are beings of pure fantasy. Richly plussed with bronze details including the flower stem and the glistening Fairy herself, this exquisite sculpture embodies all the enchantment of Walt Disney's animated masterpiece and makes the ideal complement for the other dazzling Fantasia Fairy pieces from the Walt Disney Classics Collection.

SNOW WHITE AND THE SEVEN DWARFS
Disguised as an old peddler woman, the sinister Queen stealthily steers her boat through the tall reeds of the swampy water. The epitome of evil, this wicked witch has a precious but poisonous cargo aboard: a cursed apple intended to destroy innocent Snow White. Of this striking scene animation historian Al Kilgore declared that, "the Witch's trip from her castle to the forest in the fog-shrouded dawn is the most underrated scene in the entire film. It is the most subtle use of multiplane, color, and realistic animation." A truly dramatic sculpture, this powerfully crafted piece (plussed with a pewter basket handle, pewter hands and wooden oar), conveys the darkness of animation's most wicked villain, as well as the passion and grandeur of Walt Disney's first full-length animated masterpiece.

Get Grumpy

PREMIERE EVENT

OCTOBER 21 - 23, 2011

SNOW WHITE AND THE SEVEN DWARFS

Of all Snow White's seven little men, Grumpy has perhaps the most complex personality. Wearing his cantankerous heart on his well-worn sleeve, this diminutive diamond miner claims to dislike "wimmin," but he gradually comes to love the little princess. "Grumpy wears dull magenta colored jerkin," noted Walt Disney, "which somehow seems to brand him as an irritable old 'wet blanket.' You've no idea how crotchety he can be, and yet, much to his own disgust, he has a very soft heart under this exterior crustiness." Capturing all of Grumpy's grouchy personality, this humorously expressive sculpture shows why this lovable crank is the most memorable of the Seven Dwarfs.

BRER RABBIT, BRER FOX AND BRER BEAR

Galumphing and a bit bumbling, Brer Bear is Brer Fox's bosom buddy, so when the crafty fox is ready to roast Brer Rabbit for dinner, the burly big guy is more than ready to dig in. "The charm of animation is simplicity and pantomime," noted Eric Larson, one of the animal trio's directing animators. "Where could you find three more clearly defined characters getting into strange predicaments than in [the tales of Brer Rabbit]? The characters were especially fun to animate because they showed a lot of thinking going on behind them." Brer Bear (plussed with a pewter knife and fork) completes this classic scene between the clever rabbit, the sly fox and the dim-witted bruin, showing the rich and colorful chemistry Walt Disney and his artists crafted for the "three Brers."

THE JUNGLE BOOK

Be-bopping along and singing a jungle song, Baloo the jive-talking bear and Mowgli the man-cub are an inseparable pair. “I kept thinking how can I make this bear and this kid feel closer together,” noted animator Ollie Johnston, while fellow Disney artist Frank Thomas added, that with Baloo and Mowgli, “I think we got the strongest friendly relationship between two characters we ever got in any picture.” Baloo was to originally have had a much smaller role in The Jungle Book but the relationship between the boy and bear was so heart-felt, the jazzy bruin’s role grew. Plussed with a pewter cowlick on Mowgli, this irresistible sculpture highlights the humorous and heart-warming jungle-born kinship between two of Walt Disney’s most cherished characters — the endearing “Little Britches” and his ever-lovin’ “Papa Bear.”
